ABOUT ME

Date of birth: April 1, 1999

WORK EXPERIENCE

Full Stack Developer

February 2024 - present

Stryve Solutions

- Development of a dashboard for tracking energy consumption and various device parameters such as CO2 levels, temperature, and humidity, etc., using Vue.js and PHP Laravel.
- Contribution to improving the frontend of a WordPress project for booking workspaces through team collaboration, utilizing technologies such as PHP, jQuery, and CSS.
- Design user interfaces and experiences (UI/UX) for various projects, focusing on creating visually appealing and user-friendly designs.
- Build custom, responsive websites using Wordpress with Elementor, to ensure attractive and functional web pages.

Web Developer Intern

August 2023 - February 2024

Stryve Solutions

Collaboration in a team for the development of SaaS projects, including:

Assets Management System:

- Creation of interactive and responsive interfaces using Vue.js.
- Implementation of backend functions with PHP Laravel.
- Optimization of database interactions for better performance.

Fitness Web App:

- Improvement of user experience through interactive components within the web application created with Next.js.
- Contribution to the implementation of payment functionalities using Stripe.
